Troubleshooting EC2 instances

[PDF](#) | [Kindle](#) | [RSS](#)

The following documentation can help you troubleshoot problems that you might have with your instance.

Contents

- [Troubleshooting instance launch issues](#)
- [Troubleshooting connecting to your instance](#)
- [Troubleshooting stopping your instance](#)
- [Troubleshooting terminating \(shutting down\) your instance](#)
- [Troubleshooting instances with failed status checks](#)
- [Troubleshooting an unreachable instance](#)
- [Booting from the wrong volume](#)
- [Using EC2Rescue for Linux](#)
- [Sending a diagnostic interrupt \(for advanced users\)](#)

For additional help with Windows instances, see [Troubleshooting Windows Instances](#) in the *Amazon EC2 User Guide for Windows Instances*.
