Check that your Puppet manifest conform to the style guide

Install It!

```
package { 'puppet-lint':  
  ensure => '1.1.0',  
  provider => 'gem',  
}
```

Or, if you really must:

```
$ gem install puppet-lint
```

Run It!

```
$ puppet-lint /etc/puppet/modules  
foo/manifests/bar.pp - ERROR: trailing whitespace found on line 1  
apache/manifests/server.pp - WARNING: variable not enclosed in {} on line 56  
...
```

Fix Them!

```
$ puppet-lint --fix /etc/puppet/modules  
foo/manifests/bar.pp - FIXED: trailing whitespace found on line 1  
apache/manifests/server.pp - FIXED: variable not enclosed in {} on line 56  
...
```

Head on over to the [checks page](#) to see a description of each check and get some help on how to clear those errors.
