

Practice Quiz: Deploying Puppet Locally

TOTAL POINTS 5

1. Puppet evaluates all functions, conditionals, and variables for each individual system, and generates a list of rules for that specific system. What are these individual lists of rules called? 1 point
 - ☐ Manifests
 - ☐ Dictionaries
 - ☒ Catalogs
 - ☐ Modules

2. After we install new modules that were made and shared by others, which folder in the module's directory will contain the new functions and facts? 1 point
 - ☐ files
 - ☐ manifests
 - ☒ lib
 - ☐ templates

3. What file extension do manifest files use? 1 point
 - ☐ .cfg
 - ☐ .exe
 - ☒ .pp
 - ☐ .man

4. What is contained in the metadata.json file of a Puppet module? 1 point
 - ☐ Manifest files
 - ☒ Additional data about the module
 - ☐ Configuration information
 - ☐ Pre-processed data

5. What does Puppet syntax dictate we do when referring to another resource attribute? 1 point
 - ☐ Enter the package title before curly braces
 - ☐ Follow the attribute with a semicolon
 - ☒ Capitalize the attribute
 - ☐ Type the attribute in lowercase
